Mounting Method:

Any acceptable

End Application:

Control pwr thyristor

Panel Material:

Steel

Input Phase:

Three

Inclosure Feature:

Dripproof

Panel Quantity:

1

Input Voltage Rating:

440.0 ac pounds per hour wet

Input Frequency In Hertz:

60.0

Criticality Code Justification:

Zzzy

Surface Treatment:

Any acceptable

Reference Number Differentiating Characteristics:

Magnetic permeability shall not exceed 2.0 after fabrication

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T122-g
