**End Application:**

Controller temperature

**Panel Material:**

Steel

**Input Phase:**

Three

**Inclosure Feature:**

Dripproof

**Panel Quantity:**

1

**Electrical Input Quantity:**

1

**Input Voltage Rating:**

440.0 ac pounds per hour wet

**Input Frequency In Hertz:**

60.0

**Criticality Code Justification:**

Zzzy

**Reference Number Differentiating Characteristics:**

Magnetic permeability shall not exceed 2.0 after fabrication

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T122-g
