End Application:

Ac-130u bmfd

General Description:

This is a emi filter assembly that is a subassembly of the interstate electronics corporation battle management center multi-function display (b-mfd). The purpose of the filter is to limit emi signals generated within the b-mfd from being conducted along the external ac lines and also to reduce susceptibility of the ac input lines to externally generated noise; input power 115 vac; 400 hz; single phase
