Operating Temperature Range:

-20.0/+70.0 degrees celsius

Inclosure Type:

Open

Circuit Construction Type:

Solid state

Operating Ac Frequency In Hertz:

60.0 single voltage

External Ac Operating Voltage In Volts:

600.0 single voltage

Special Features:

A voltage/phase sensing relay which helps protect equipt against low voltage; voltage unbalance; phase loss and phase reversal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
