**Operating Temperature Range:**

-20.0/+70.0 degrees celsius

**Inclosure Type:**

Open

**Circuit Construction Type:**

Solid state

**Operating Ac Frequency In Hertz:**

60.0 single voltage

**External Ac Operating Voltage In Volts:**

600.0 single voltage

**Special Features:**

A voltage/phase sensing relay which helps protect equipt against low voltage; voltage unbalance; phase loss and phase reversal

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A32200
