Average Life Measurement:

Years

End Application:

Switchboard, mn prop, p/n 1648a34g06, used onboard 400 ft wagb coast guard vessels

Inclosure Type:

Open

Circuit Construction Type:

Solid state

Special Features:

Current sensor 50mv/2.5v-5v, low output ripple; a 121 control module is 10k c/s push-pull magnetic preamplifier intended for isolation and preamplification of feedback signals from d-c ammeter shunts and d-c machine armatures when required

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
