**Average Life Measurement:**

Years

**End Application:**

Switchboard, mn prop, p/n 1648a34g06, used onboard 400 ft wagb coast guard vessels

**Inclosure Type:**

Open

**Circuit Construction Type:**

Solid state

**Special Features:**

Current sensor 50mv/2.5v-5v, low output ripple; a 121 control module is 10k c/s push-pull magnetic preamplifier intended for isolation and preamplification of feedback signals from d-c ammeter shunts and d-c machine armatures when required

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A32200
