**End Application:**

Motor; stream (std. Tensioned replenishment at sea method)

**Phase:**

Three

**Special Features:**

Wkit contains 3matched motor-winding thermostats; thermost ats are tied in place on the end turns of appropriate winding bundles, one to each phase or buried in the windings during motor rewind; are connected in series between the starter coil and its power supply; supplements conventional current overload relays in magnetic starters, protects against blocked ventilation, high ambient temperatures, single-phasing, and dangerous running overloads; operating temperature: 140 degrees c

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**
