End Application:

5e & 7.3e gas driven marine generators

Inclosure Type:

Partially enclosed

Product Name:

5e & 7.3e ignition voltage regulator

Special Features:

Regulator is powerboost iii, driven by 16hp, twin cylinders, overhead valve engines. Regulator controls voltage to within \pm 2%, minimal fluctuation eliminates problems with sophisticated electronic equipment

Frequency In Hertz:

50.0 and 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A31700
