Ac Voltage Rating:

115.0 volts

Frequency Rating:

400.0 hertz

End Application:

E2c aircraft

Inclosure Feature:

Inclosed, ventilated inclosure

Amp Size Rating:

150.0

Criticality Code Justification:

Agav

Product Name:

Outline, motor controller

Phase:

Three

Special Features:

Has chassis tbi (.437-14unc-3a x .880long); 3phase input tbi (.375-24unc-3a x .880l); connector recept for dc (d38999/20nb-98pn); 2 connector recept for motors (ms3452w24-10sn and ms3452w24-10sw); connector receptacle for control signal (d38999/20we35pn); and connector recept for compresor signal (d38999/20wd-19sn)

Reference Number Differentiating Characteristics:

As differentiated per drawing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A541b0
