**Ac Voltage Rating:**

115.0 volts

**Frequency Rating:**

400.0 hertz

**End Application:**

E2c aircraft

**Inclosure Feature:**

Inclosed, ventilated inclosure

**Amp Size Rating:**

150.0

**Criticality Code Justification:**

Agav

**Product Name:**

Outline, motor controller

**Phase:**

Three

**Special Features:**

Has chassis tbi (.437-14unc-3a x .880long); 3phase input tbi (.375-24unc-3a x .880l); connector recept for dc (d38999/20nb-98pn); 2 connector recept for motors (ms3452w24-10sn and ms3452w24-10sw); connector receptacle for control signal (d38999/20we35pn); and connector recept for compresor signal (d38999/20wd-19sn)

**Reference Number Differentiating Characteristics:**

As differentiated per drawing

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A541b0
