Overall Length:

4.130 inches

Overall Height:

0.890 inches

Overall Width:

2.950 inches

End Application:

Missile, minuteman iii. Lgm-30

Product Name:

Potentiometer input signal conditioner

Special Features:

Input voltage withstand: 240 vrms, gain/offset adjust: +/-5%, module bandwidth: 3 hz, output control: always enabled, output resistance: less than 1 ohm, interface: 8 pos terminal block

General Description:

Input range: 0 - 10000 ohms, output range: 0 to +10 v, mechanical format: din rail, isolation voltage: 1500 vrms, isolation type: transformer 3- way, accuracy: +/-0.03%, supply voltage: 15 - 30 vdc (+24v nom)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
