Mounting Method:

Plug-in

End Application:

Hi-speed bus terminals or vga cards

Regulation Method:

Electromechanical

Electronic Device Type:

Solid state

Input Current Type:

Dc

Terminal Location:

Side

Case Material:

Plastic

Product Name:

1a dropout positive adjustable or fixed-mode regulator

Voltage In Volts:

18.0

Special Features:

Has 1.4v maximum dropout at full load current; refer to ap1117/ap1117i document on cage website for additional details

Terminal Type And Quantity:

3 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A541a0
