Prime Mover Cooling Medium:

Air

Mounting Type:

Wheel

Overall Length:

96.000 inches

Overall Height:

50.000 inches

Overall Width:

50.000 inches

Current Type:

Dc

Dc Voltage Rating:

28.0 volts

Accessory Component Quantity:

2

Document Type:

Technical manual

Document Identification:

T.O.35c2-3-304-1, -3, -4

Inclosure Type:

Fully enclosed

Accessory Controlling Agency:

Asg

Accessory Identifying Number:

An2551e30/6150-502-1042/ part no.

Identifying Number:

G32-3 part no.

Winterization Feature:

Included

Manufacturer Name:

Jack and heintz, inc

Dc Wattage Rating:

30.0 kilowatts

Excitor Type:

Self-excited

Prime Mover Starting Method:

Electric motor

Cranking Voltage In Volts:

24.0

Automatic Starting Feature:

Not provided

Prime Mover Manufacturer Name:

Continental motors corp

Prime Mover Identifying Number:

Pe150-2 model no.

Housing Type:

Inclosed

Accessory Component Name:

Cable assembly

Ambient Temperature In Deg Celsius:

-54.0 and 71.0

Radio Interference Suppression:

Included

Document Controlling Agency:

Usaf

Special Features:

Self-propelled

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T322-a
