Prime Mover Cooling Medium:

Air

Mounting Type:

Skid shock tubular frame

Overall Length:

51.000 inches

Overall Height:

27.000 inches

Overall Width:

30.000 inches

Current Type:

Ac

Frequency Rating:

400.0 hertz

Item Name Assigned By Government Agency:

Generator set, gasoline engine

Winterization Feature:

Included

Ac Wattage Rating:

10.0 kilowatts

Line To Line Voltage In Volts:

240.0 and 120.0 and 208.0

Line To Neutral Voltage In Volts:

120.0

Power Factor In Percent:

80.0

Excitor Type:

Separately excited

Excitor:

Included

Prime Mover Starting Method:

Electric motor and manually by rope

Cranking Voltage In Volts:

24.0

Automatic Starting Feature:

Not provided

Prime Mover Manufacturer Name:

Any acceptable

Housing Type:

Open

Ambient Temperature In Deg Celsius:

-53.9 and 51.7

Temperature Rise Rating In Deg Celsius For Continuous Operation:

75.0

Radio Interference Suppression:

Included

Phase:

Single and three

Specification Or Standard:

1 type and 2 class and 10 size

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T322-a
