Body Type:

Flat bed

Phase:

Three

Special Features:

Cummins qsb4.5 diesel engine operating at 2000rpm, turbocharged 4-stroke, inline 4 cylinder common rail fuel system, 12vdc battery system, intake manifold pre-heater for cold weather starting, continuous rating: 60kva, 3 phase.4 wire115/200 volt wye, line drop compensation, engine protection: low oil shutdown, high coolant temperature shutdown, low coolant level shutdown, intake air restriction indication, relative humidity: 10-95%, operating temperature: -31 degrees to +52 degrees celsius, instrumentation: coolant meter, battery meter, voltmeter, hour meter, oil pressure meter, fuel meter, frequency meter, ampmeter, buttons: engine start, engine stop, panel lights, phase select, fault reset, generator protection: over/under voltage, over/under frequency, protective finish: zinc primer, top coat: anti-corrosive polyester power coat, size: 101.000 inch long x 67.000 inchwide x 67.000 inch high

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T322-a
