Prime Mover Cooling Medium:

Air and liquid

Compressor Speed At Rated Capacity In Rpm:

7100.0

Overall Length:

41.04 inches

Overall Height:

32.14 inches

Overall Width:

31.04 inches

Current Type:

Dc

Dc Voltage Rating:

12.0 volts

Cooling Method:

Heat exchange or radiator

End Application:

4920-01-549-7112

Prime Mover Type:

Diesel engine

Usage Design:

Low speed belt-driven air compressor & generator

Unpackaged Unit Weight:

870.0 pounds

Pump Type:

Rotary

Ac Wattage Rating:

3.36 kilowatts

Prime Mover Starting Method:

Electric motor and battery

Compressor Capacity Rating:

35.0 cubic feet per minute

Product Name:

Liquid-cooled low speed belt driven air compressor & generator system

Special Features:

Used with lubricating unit, power operated

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T322-a
