Frequency Rating:

50.0 hertz single component or 60.0 hertz single component

Inclosure Type:

Partially enclosed, half shell

Winding Operating Voltage:

380.00 ac pounds per hour dry single component single primary and 575.00 ac pounds per hour with retaining chain single component single primary

Special Features:

All copper windings; iec type finger safe terminals; class 1, general use, isolating transformer, 30 pounds

Terminal Type And Quantity:

1 screw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
