## NSN 6125-00-392-7185

Dynamotor-power Supply - Page 1 of 2

View Online at https://aerobasegroup.com/nsn/6125-00-392-7185 **Overall Length:** 13.812 inches **Overall Height:** 6.250 inches **Overall Width: 6.875** inches **Current Type:** Dc and dc and dc and ac Dc Voltage Rating: 380.0 volts and 225.0 volts and 225.0 volts **Mounting Configuration:** Rack mtd **Voltage Rating:** 1.3 volts and 1.3 volts and -25.0 volts and 6.0 volts **Rectifier Type:** Synchronous self-rectifying vibrator **Output Frequency Rating:** 100.0 hertz **Output Current Rating:** 0.180 amperes and 0.070 amperes and 0.045 amperes Input Voltage Rating: 24.0 volts **Current Rating:** 1.0 amperes and 0.200 amperes and 0.005 amperes and 2.0 amperes **Regulated Output Current:** Not provided and not provided and not provided **Regulated Current:** Provided and provided and not provided and not provided **Input Current Rating:** 10.0 amperes Radio Frequency Filter: Provided Phase: Single **Special Features:** Tropicalized; jcens, radio set, type no. An/vrc-6 and an/vrc 19 **Specification Or Standard:** Dy-98/g type

**Unit Of Measure:** 

N/a

Shelf Life:
