Overall Length:

4.000 inches

Overall Height:

0.562 inches

Overall Width:

4.000 inches

Major Components:

Capacitor, fixed 3; ejector, board 1; pad, transistor 5; printed wiring board 1; radiator, heat, transistor 1; resistor, fixed 17; resistor, variable 2; semiconductor device, diode 3; transistor 6

Mounting Configuration:

Plugs into printed circuit connector

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T01200
