Terminal Quantity:

20

Terminal Type:

Screw

Width:

19.000 inches

Length:

24.000 inches

Input Phase:

Three

Frequency Regulation Percent:

0.5

Accuracy In Percent:

4.0

Input Frequency Rating:

60.0 hertz

Output Frequency Rating:

400.0 hertz

Line To Ground Voltage:

Between 120.0 volts and 208.0 volts

Mounting Method:

Carrying case and table

Cooling Method:

Integral fan

Output Wattage Rating:

4.0 kilowatts

Volt-ampere Rating:

5.0 kilovolt-ampere

Line To Line Ac Output Voltage Rating:

Between 120.0 volts and 208.0 volts

Ac Input Voltage Rating:

Between 120.0 volts and 208.0 volts

Overload Protection:

Provided

Radio Interference Filter:

Provided

Phase:

Three

Height:

17.500 inches

Fsc Application Data:

Radio and television, nonairborne, except specially designed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T320-h
