End Application:

Ortec 401a/402a bin and power supply

General Description:

Provides bias voltage for detectors requiring bias currents less than 0.1 ma, 2 simultaneous outputs one; 0 to 5 kv, and the other; 0 to 500 v, controlled by a 5-turn direct-reading potentiometer, positive or negative available, determined by an internal switch and indicated by a light on front panel, temp range 0 to 50 degrees c, output current 0 to 100 micro-amps, standard single-width nim module 1.350 by 8.714 in.

Shelf Life:

N/a

Unit Of Measure:
