Overall Length:

3.750 inches

Overall Height:

2.530 inches

Overall Width:

2.380 inches

End Application:

Pacer dawn

Maximum Operating Altitude Rating:

78000.0 feet

Electrical Power Source Relationship:

Operating

Input Voltage Rating:

115.0 ac pounds per hour wet single operating power rqmt

Operating Ambient Temperature Range:

-40.0/+125.0 degrees celsius

Special Features:

Converter module consists of one transformer, four inductors, a metal base, two printed wiring boards with terminals-stud, and a connector. inductance is 3 millihenries min. voltage 1.0 volts rms, 400 hertz sine wave. Current 1.2 amperes dc. Second rating: inductance 80 millihenries min. Voltage 1.0 volts rms, 400 hertz sine wave. Current 0.175 amperes dc.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A39900
