End Application:

Mc130e

Electrical Power Source Relationship:

Operating

Input Voltage Rating:

104.0 ac pounds per hour dry single operating power rqmt and 122.0 ac pounds per hour with retaining chain single operating power rqmt

Output Voltage Rating:

5.0 dc volts 2nd power output

Input Frequency Rating:

360.0 hertz single operating power rqmt and 440.0 hertz single operating power rqmt

Special Features:

Power supply operates from 115v, 400hz aircraft power. Its stepped downby means of a transformer, rectified and filtered producing two dc voltages 15volts and m15volts. A voltage regulator reduces the 15volt dc to 5volts which powers all the digital logic devices contained within the attitude stability amplifier; the 5volt dc is ovp

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A39900
