End Application:

Test station elec

Special Features:

Includes m9a, ieee-488 interface which provides voltage and current programming, as well as readback with 12bit resolution

Functional Description:

Rparallel interface controller (pic) provides control for up to 4 dcrt series 5kw and 10kw power supplies in parallel; single control for both voltage and current, front panel meters to display voltage and total current

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
