Overall Length:

19.000 inches

Major Components:

Includes power conditione (an isolation transformer with rfi filters and spike absorbers) and ups which is composed of a high power factor ac-dc converter, a removable battery pack, a battery charger, a dc-ac inverter, and a microcontroller-based control circuit

Battery Quantity:

8

Electrical Power Source Relationship:

Alternate operating

Installation Design:

Rack

Output Voltage Rating:

115.0 ac volts multiple power outputs w/identical ratings

Battery Feature And Type:

Rechargeable lead acid cell

Battery Power Supply Emergency Operating Time:

10.0

Special Features:

Item is single phase-1kw/2kva

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A39900
