Regulation Type:

Multiple stages

Charger Type:

Solid state semiconductor

Charging Voltage In Volts:

24.0

Charging Current Rating In Amps:

60.000

Charging Regulation Method:

Continuous

Battery Type For Which Designed:

Lead-acid or nickel-cadmium

Special Features:

Model a41; 60 amps maximum charging, 24 volts dc output; 120 volts ac input; single phase; 12 lead acid cells; 10055-two battery charge divider with negative ground

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A31600
