Environmental Protection:

Shock resistant and vibration

Operating Temperature Range:

+0.0/+55.0 degrees celsius

Average Life Measurement:

Not rated

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Rack

Circuit Construction Type:

Solid state

Operating Ac Frequency In Hertz:

47.0 single voltage and 400.0 single voltage

External Ac Operating Voltage In Volts:

115.0 single voltage and 200.0 single voltage

Phase:

Three

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
