Overall Length:

2.400 inches

Output Impedance Rating:

50.0 ohms single power output

Input Voltage Rating:

150.0 dc volts single operating power rqmt

Output Voltage Rating:

15.0 dc volts single power output

Output Wattage Rating:

100.0 watts single power output

Product Name:

Converter, direct current to direct current

Special Features:

Dielectric withstand characteristics: input to output: 3000.0 ; output to baseplate: 599 ; input to baseplate: 1500.0 ; thermal characteristics: efficiency: 80-90 percent, baseplate to sink: 0.14; weight: 3.8 ounces, typical; no load power dissipation: 1.35 typical; current limit: 105.0 percent minimal to 125.0; g percent ; gate in impedance: 1000 typical

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A39900
