Rectification Method:

Six phase wye

Product Name:

Rf power module

Special Features:

High spwwd pwer meter making up to six power measurements . Has a range of 70 dbm to + 44 dbm sensod dependent with frequenc range of 10 khz to 40 gjz. Diode and thermocoupler sensors with 90 db range. Six channels. 30 readings per second over gpib for a single channel. Meter. Dult cycle for pulse power measurements. Programable 30 mhz calibrator.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A39900
