Overall Length:

5.250 inches

Overall Height:

0.850 inches

Overall Width:

3.750 inches

Special Features:

Output voltage 12v, output current 8.33 amps, input 103-127vac, 90-160vdc, 47-440hz single phase, 100 watts output, isolation voltage: 700vdc input to output, 500vdc input to case, 200vdc output to case, insulation resistance: 50 mohms between input and output, input transient protection: provide regulated output at 180vac for 0.1 second, switching freq: 160 to 200 khz fixed, load overshoot: 0.5v from voltage set point, short circuit protection: protected for any duration. Hookups: subminiature connectors m24308/24 type.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A39900
