Overall Length:
4.000 inches
Overall Height:
0.850 inches
Overall Width:
3.250 inches
Special Features:
Output voltage 12v, output current 4.16 amps, input 103-127vac, 90-160vdc, 47-440hz single phase, isolation voltage: 700vdc input to
output, 500vdc input to case, 200vdc output to case, insulation resistance: 50 mohms between input and output, input transient protection:
provide regulated output at 180vac for 0.1 second, switching freq: 160 to 200 khz fixed, load overshoot: 0.5v from voltage set point, short
circuit protection: protected for any duration. Hookups: subminiature connectors m24308/24 type.
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Yes - demil/mli
Fiia:
