Overall Length:

6.500 inches

Overall Height:

0.850 inches

Overall Width:

4.500 inches

Special Features:

Output voltage : 28v, output current: 7.14amps, 200 watts single output, input: 103-127vac, 47-440hz, 90-160vdc, isolation voltage: 700vdc input to output, 500vdc input to case, 200 output to case, insulation resisatance 50 mohms between input and output when measured at 50vdc, input transient protection: 180 vac for 1.0 second, complete protection of short circuit for any duration, remote sensing: compensates for up to 0.5 volt drop, switching freq: 160 t0 200khz fixed, hook up: d-subminature connectors

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A39900
