End Application:

Common air route surveillance radar antenna dr system (carsrads)

Special Features:

The el9190 feed terminal can be positioned at any location between the input and output terminals for establishing a further potential group or for supplying the terminals following on the right in applications with high current load. voltage arbitrary up 230v ac. In order to monitor the supply voltage, the terminals with diagnostics function report the status of the power feed terminal to the ethercat coupler through two input bits

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A39900
