Regulation Type:

Multiple stages

Charger Type:

Solid state semiconductor

Charging Voltage In Volts:

Between 7.2 and 18.0

Battery Type For Which Designed:

Lithium-ion and nickel-cadmium

Product Name:

1 hour dual port charger

Special Features:

Led indicator communicates charge status, power line problems, replace pack, and battery too hot/cold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A31600
