Terminal Quantity:

4 and 3

Terminal Type:

Solder tab and pin

Overall Diameter:

1.250 inches

Overall Thickness:

0.300 inches

Battery Electrolyte:

Lithium thionyl chloride

End Application:

Spectrum monitor

Ampere Hour Capacity:

1.40 and 1.50

Time Capacity In Hours:

24.00

Storage Type:

Temperature controlled warehouse

Voltage In Volts:

3.5 and 3.6

Special Features:

Requires special handling - may explode with toxic fumes if shorted. Cell case stainless steel; hermetic ceramic seal to stainless steel

Shape:

Cylindrical

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T139-a
