Terminal Quantity:

2

Overall Length:

Between 1.969 inches and 2.002 inches

Overall Diameter:

Between 0.522 inches and 0.544 inches

Battery Electrolyte:

Lithium

Terminal Location:

Bottom and top

Criticality Code Justification:

Zzzy

Voltage In Volts:

3.95

Shape:

Cylindrical

Reference Number Differentiating Characteristics:

Material will be in accordance with navicp m activity hx quality control, manufacturing and testing specifications.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T139-a
