Mounting Method:

Case

Battery Quantity:

4

End Application:

Nha sequence, advanced recovery on f15, f-16, f-117 & a-10 acft

Usage Design:

Powers the ars unit

Component Controlling Agency:

Mcdonnell douglas

Component Name:

Power module

Component Identifying Number:

A119077-13 part no.

Special Features:

Includes 2 batteries p/n cap12181 and 2 batteries p/n eap12181 all rated at 22.5 volts each; capacitors and indicator; battery electrolyte: lithium

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T139-b
