Terminal Quantity:

2

End Application:

F/a-18 a/b; aircraft, hornet f/a-18

Voltage In Volts:

9.0

Special Features:

Item is lithium manganese dioxide battery assembly containing 2 parallel strings, each with 3 cr-2 size limn02 cells and schottky blocking diode; item is capable of mating to any acr/b-4 back-plate assembly, battery is waterproof; item must contain a foldable d-ring fastener to secure it to the backplate

Shape:

Rectangular

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T139-a
