Battery Electrolyte:

Lithium

End Application:

Wide area augmentation (waas)

Approximate Shelf Life:

10.00 years

Special Features:

Wide area temp range: discharge -40 degrees c to 70 degrees; charge -10 degrees c to 60 degrees c; high energy density: by volume: 420wh/l; by weight: 177wh/kg; fast charge with minimal loss of cycle life (80 percent capacity in 30 mins); safety features; patented cid; separator with integrated shutdown mechanism; redundant vents; aluminum can construction to optimize thermal dissipation; laser welded lid

Shape:

Rectangular

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T139-a
