**Terminal Quantity:**

4

**Overall Length:**

30.200 inches

**Overall Diameter:**

16.188 inches

**Usage Design:**

Used for laying mine mk 67 mod 2

**Terminal Location:**

End

**Approximate Shelf Life:**

12.0 months

**Cell Quantity:**

78

**Voltage In Volts:**

145.86

**Special Features:**

Battery mk 53 mod 2 used as a source of mine propulsion and control power. It is a secondary battery of the silver-zinc alkali type containing no mercury. It is made up of propulsion cells interconnected to form two electrically similar propulsion groups which may be connected in series or parallel. Also, separate control cells are interconnected to form a control section

**Precious Material And Weight:**

1070.000 silver ounces, troy

**Precious Material:**

Silver

**Supplementary Features:**

Return all cells for silver reclamation per navsupinst 4570.23a

**Purchase Description Identification:**

10001-ws12633-37

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T139-a
