Terminal Type: Post Overall Length: 329.0 millimeters Overall Height: 238.0 millimeters Overall Width: 171.0 millimeters Battery Electrolyte: Lead acid Commercial Battery Size Designation:
Post Overall Length: 329.0 millimeters Overall Height: 238.0 millimeters Overall Width: 171.0 millimeters Battery Electrolyte: Lead acid
Overall Length: 329.0 millimeters Overall Height: 238.0 millimeters Overall Width: 171.0 millimeters Battery Electrolyte: Lead acid
329.0 millimeters  Overall Height: 238.0 millimeters  Overall Width: 171.0 millimeters  Battery Electrolyte: Lead acid
Overall Height: 238.0 millimeters Overall Width: 171.0 millimeters Battery Electrolyte: Lead acid
238.0 millimeters  Overall Width:  171.0 millimeters  Battery Electrolyte:  Lead acid
Overall Width:  171.0 millimeters  Battery Electrolyte: Lead acid
171.0 millimeters  Battery Electrolyte: Lead acid
Battery Electrolyte: Lead acid
Lead acid
Commercial Battery Size Designation:
12 volt
Submersibility:
Submersible
Voltage In Volts:
12.0
Supplementary Features:
Hella gelmater is a valve regulated lead acid battery range in which the electrolyte is immobililsed with thecells using gelled electrolyte
technology
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
T139-a
