Tempurature Rating:

85.00 degrees celsius

Overall Height:

50.3 millimeters

Overall Diameter:

14.65 millimeters

Battery Electrolyte:

Lithium

Plate Material:

Plastic

Discharge Rate In Amps:

100.00

Voltage In Volts:

3.6

Special Features:

Not rechargeable, lithium thionychloride, bobbin contacts, plastic covering. capacity (at 2ma +20 degree c 2.0v cut off) 2.25ah. Open circuit voltage (at +20 degree c) 3.67v. voltage (at 0.2 ma +20 degree c) 3.6v. Continuous current permitting 50% of the capacity to be achieved at +20 degree c with 2.0v cut off; 100ma. Storage +30 degree c (+86 degree f) max. Operating temp range minus 60 degree c/+85 degree c. Diameter 14.65mm d x 50.3mm height max. Weight 16.2g. Li metal content 0.6g approx

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T139-a
