Overall Length:

7.500 inches

Overall Height:

9.300 inches

Overall Width:

8.100 inches

Case Material:

Plastic

Battery Electrolyte:

Acid

Plate Material:

Calcium lead

Plate Type:

Positive

Voltage In Volts:

6.0

Special Features:

Power watts per cell: 410; positive electrode: proven lead-calcium flat plate technology; negative electrode: flat grid with lead calcium alloy; terminal design: leak-proof compressin design seal and brass insert

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T139-a
