**Conductor Form:**

Solid single conductor

**Special Features:**

Conductor chemical composition is 85 percent silver and 15 percent copper conductor surface treatment is gold per mil-g-45204 type 1

**Precious Material And Location:**

Conductor single conductor silver and surface single conductor gold

**Precious Material:**

Silver and gold

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A077a0
