Conductor Form:

Solid single conductor

Special Features:

Conductor chemical composition is 85 percent silver and 15 percent copper conductor surface treatment is gold per mil-g-45204 type 1

Precious Material And Location:

Conductor single conductor silver and surface single conductor gold

Precious Material:

Silver and gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A077a0
