**Criticality Code Justification:**

Zzzw

**Special Features:**

Wire temperature rating: 200 degrees celsius, wire rating: 600 volts, conductor material: coated copper, conductor size: 16 awg, number of strands: 19, color: black

**Departure From Cited Document:**

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A077a0

**Mil-std (military Standard):**

Mil-w-16878 spec.
