Criticality Code Justification:

Zzzw

Special Features:

Wire temperature rating: 200 degrees celsius, wire rating: 600 volts, conductor material: coated copper, conductor size: 16 awg, number of strands: 19, color: black

Departure From Cited Document:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A077a0

Mil-std (military Standard):

Mil-w-16878 spec.
