Cross Sectional Shape:

Round

Conductor Form:

Solid single conductor

Special Features:

Core shall be soft or annealed oxygen-free copper solid wire in accordance with grade 2 of astm b 170

Material:

Copper core conductor single conductor

Precious Material And Location:

Surface single conductor silver

Precious Material:

Silver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A077a0
