Cross Sectional Shape:

Twist

End Application:

Dual dcn's on e/i fscm 81349

Conductor Quantity:

3

Conductor Form:

Braid, tubular all conductors

Special Features:

Jacket material, extruded white fluorinated ethylene propylene (fep)

Material:

Plastic fluorinated ethylene propylene core conductor all conductors

Precious Material And Location:

Silver-coated copper braid silver

Precious Material:

Silver

Specification Data:

81349-mil-dtl27500 government specification and 81349-mil-w-22759/11 government specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A077a0
